SUMMARY

Software Engineer with 4+ years of experience building Python APIs, backend services, and data-intensive processing systems. Background spans financial systems, cloud data platforms, distributed data processing, and web applications. Focused on maintainable, reliable software across APIs, pipelines, monitoring, and production workflows.

TECHNICAL SKILLS

Languages: Python, SQL, Java, JavaScript, PHP

Backend and Web: API development, FastAPI, Flask, React

Data and Distributed Systems: PySpark, data pipelines, ETL/ELT, Delta Lake, Lakehouse architectures

Cloud and Infrastructure: AWS (S3, Glue, Lambda), Microsoft Azure, Microsoft Fabric, OneLake, Docker, Git, CI/CD (GitHub Actions), Linux/Bash, Grafana

Databases: PostgreSQL, MySQL, SQL Server, MongoDB, InfluxDB

PROFESSIONAL EXPERIENCE

Data Scientist | BRUC Energy

May 2026 - Present

Madrid, Spain

- Design and develop maintainable data applications and processing workflows with Python, PySpark, SQL, and Microsoft Fabric for renewable-energy operations.
- Build and maintain pipelines and Lakehouse components across OneLake and Delta Lake, with emphasis on data quality, traceability, scalability, and maintainability.
- Automate recurring operational processes and data workflows, replacing manual execution with repeatable engineering implementations.
- Translate business requirements into technical implementations spanning ingestion, transformation, validation, and downstream data consumption.

Data Engineer | NTT DATA Europe & Latam

Sep 2025 - May 2026

Remote - Madrid, Spain

- Implemented event-driven ingestion and transformation pipelines with AWS S3, Glue, Lambda, and PySpark, plus Dockerized microservices for data ingestion and preprocessing.
- Designed and maintained Python and SQL ETL pipelines for structured and semi-structured data, covering ingestion, transformation, and validation.
- Applied semantic technologies and knowledge graphs within a European Union AI-ready data-governance initiative to improve interoperability, traceability, and data quality.

Software Engineer II | Ryü Capital

Jul 2024 - Mar 2025

Promoted from Software Engineer I (Jul 2022 - Jun 2024) | Remote - Zurich, Switzerland

- Led the design and implementation of Python backend APIs and services with FastAPI and Flask for algorithmic-trading and financial analytics systems, focusing on performance, scalability, and reliability.
- Created Python and PySpark processing workflows to ingest, clean, and structure large financial and market datasets, supported by SQL and time-series database systems.
- Maintained Grafana monitoring and Python diagnostics tooling for strategy and system performance, troubleshooting issues and supporting reliable operational workflows.

Software Developer Intern | Hogarth Worldwide

Apr 2022 - Jun 2022

Hybrid - Madrid, Spain

- Supported React and JavaScript web applications and PHP backend components, debugging issues and improving existing code with senior developers.

Java Developer Intern | CGI

Apr 2020 - Jun 2020

Hybrid - Madrid, Spain

- Maintained Java enterprise applications through defect fixes, code review, and technical documentation.

EDUCATION

Bachelor's Degree in Software Engineering, specialization in Data Engineering (in progress) | U-tad | 2023 - Present

Higher Technician Diploma in Cross-Platform Application Development | Campus FP | 2020 - 2022

Intermediate Vocational Training Certificate in Microcomputer Systems and Networks | La Salle Grñón | Sep 2018 - Jun 2020

LANGUAGES

Spanish (native) | English (C1)
